Hi Treat. I finally had a chance to go through this draft. Attached are my and Jesse's comments (some of mine are in green text, but most of ours are in comment bubbles). The big changes we made were that we determined that all references to Five Points, Cole and Clayton neighborhoods should be deleted. With OU1 delisted, the target community is now Globeville, Swansea and Elyria. Where those neighborhoods are described, there needs to be more attribution to neutral sources such as the Census. Also, now we will need different maps that highlight the OU2 and OU3 locations and just those three neighborhoods (perhaps OU1 can be shown in a deemphasized way with a grayed out dotted line or something). Finally, we eliminated some of the suggested outreach such as door to door and flyering, as that level of outreach is unlikely at this point at the site.

Thanks for your work on this,  
-jc

p.s... Jesse changed some of the formatting such as keeping everything two column on each page.
